

RESPITE TRAINING

The Arkansas Lifespan Respite Coalition has created a free, online training opportunity for individuals interested in providing respite care. The need is great - there is a shortage of trained in-home respite care providers.

The Arkansas Lifespan Respite Care Provider Training certification course contains one introductory course and ten respite-specific skill courses. Courses are self-paced and free of charge. Interested individuals will create a login ID and password to the training system to gain access.

After finishing the courses, trainees will receive a Certificate of Completion and can then place themselves and the respite services they choose to provide on the Arkansas Lifespan Respite Search Locator. This allows caregivers to search for trained respite care providers and connect with them for available respite opportunities.
